

# Individual Task

## Exploring the future world of work

**Your project brief is to research the One Stockport Borough Plan and create a presentation about the sectors, jobs or skills that will be important for future growth locally. Your audience is other young people aged 14-19 years of age who are considering their next steps.**

You may use any presentation format(s) you wish, please give your reasons behind your choice(s) when making your presentations. We have provided this template PowerPoint with some guidance notes, but you may want to use video, audio or mixed media to make your presentation engaging.

You should consider the information that young people need to know about having a future in the Stockport local economy, as well as the communicating the local authorities plans.

# Your Presentation Brief

Here are some of the points you might want to include to summarise the plan and what it means for young people in Stockport. Pick what you feel is important and relevant to your audience and your project.

- What did you learn?
- How did reading the plan make you feel?
- What are your thoughts on the plan?
- What do you think the next steps to take are?
- In terms of how you feel about your future - do you feel more, less or the same level of confidence after researching the plan?
- What do you think the main barriers to young people who want to study and work in Stockport are? Does this plan address them?
- Do you think enough young people are aware of these plans? If not, why not, and how does your choice of presentation begin to address this?
- What more needs to be done, and who should be involved?
